When accessing personal data for remote learning purposes, all staff members will:

Access the data using either Google Classroom or Class Dojo which both have secure access

Use school devices to access data

4.2 Processing personal data

Staff members may need to collect and/or share personal data such as email addresses as part of the remote learning system. As long as this processing is necessary for the school's official functions, individuals won't need to give permission for this to happen.

However, staff are reminded to collect and/or share as little personal data as possible online.

4.3 Keeping devices secure

Talk to your IT staff if you want to include details on how to put these measures in place.

All staff members will take appropriate steps to ensure their devices remain secure. This includes, but is not limited to:

Keeping the device password-protected – strong passwords are at least 8 characters, with a combination of upper and lower-case letters, numbers and special characters (e.g. asterisk or currency symbol)

Ensuring the hard drive is encrypted – this means if the device is lost or stolen, no one can access the files stored on the hard drive by attaching it to a new device

Making sure the device locks if left inactive for a period of time

Not sharing the device among family or friends

Installing antivirus and anti-spyware software

Keeping operating systems up to date – always install the latest updates
